

HTML & CSS training course

Practical lesson 1

Task

Please, master the page according to design using the *contacts.psd* (or *contacts.png*).

Files are located in

```
html_css_course_files/_src/practical_lesson_1
```

Cropped images are located in

```
html_css_course_files/_src/practical_lesson_1/graphics
```

Requirements

1. DIVs used
2. Browsers: IE 8+, Chrome, FF 11+
3. Doctype: transitional
4. XHTML 1.1, CSS 2.1

Basic level

- Fixed width
- Standalone images

Advanced level

- Sprites (please, provide names list for standalone images in case you're gonna use sprites)
- Opera support
- Safari support
- Fluid width

Pro level

- Left column has fixed width (as on design) and Content is fluid (from left column to right side of window)
- Color scheme support
- Source design scheme + Your own color scheme (no need to change the graphics, only CSS). For example "Dark" skin

Design description

Clicking on links could do nothing

no JS allowed or needed

Search field hint-text could stay the same after field is clicked

Top navigation items should change when hovered (see "Favourite" tab)

Top navigation item "Configure" should be right aligned

We could have 2+ lines in top navigation (for example, 20 items)

Left navigation items should change when hovered (see "Office contacts" item)

Left navigation item "Office contacts" is selected

Content header gray background and edit, delete icons are shown when header is hovered. If no hover, Folder icon and category name "Office contacts" are shown

In case Edit or Delete icons are hovered, they should change color to red (see edit icon "pencil" on the image)

If "Add contact" item is hovered, border color should change to red, icon color should change to red

Contacts number could be any. If we have a lot of contacts, scroll should appear

Photoshop hints

Use Ctrl+; to show/hide guides (Command+; for Mac users)

Use "Info" block + Rectangular marquee tool to view width/height of elements. To enable it go to Window -> Info
